

AMENDMENTS TO CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A receiving process comprising:

storing at least one predetermined keyword in a first mobile phone in advance, the keyword being related to one of a plurality of software installed in the mobile phone;

appending a keyword in an electronic message sent from a remote second mobile phone to the first mobile phone;

in response to receipt by the first mobile phone of the electronic message having said keyword appended to the message, searching for the predetermined keyword by a microprocessor of the first mobile phone after the electronic message is received;

finding the predetermined keyword matched to and the keyword contained in the electronic message;

finding and activating the processing software related for processing the electronic message according to the predetermined keyword if there is a match between the predetermined keyword and the keyword contained in appended to the electronic message; and

immediately processing the electronic message for output from an output device coupled to the first mobile phone by the related software without requiring the user to first open the message.

2. (Canceled)

3. (Currently Amended) The receiving process of claim 1, there in the electronic message is processed by a typical receiving process when there is no keyword found in the electronic message.

Serial Number 09/737,477

4. (Currently Amended) The receiving process of claim 1, wherein when no electronic message is received as determined by the microprocessor, the microprocessor is commanded to perform the steps of:

determining whether there is a sent electronic message and ending the process if the determination is negative;

reading the attached keyword contained in the electronic message if the determination is positive;

appending the attached keyword to the electronic message;

sending the electronic message to the remote second mobile phone;

ending the process after the sending.

5. (Currently Amended) The receiving process of claim 3, wherein the electronic message is processed by the microprocessor by a typical sending process when no attached keyword is found in the electronic message as determined by the microprocessor.

6. (Canceled)

7. (Canceled)

8. (Original) The receiving process of claim 1, wherein the electronic message is an e-mail.

9. (Original) The receiving process of claim 1, wherein the electronic message is a short message.
